MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management's Discussion and Analysis ("MD&A") is intended to provide a summary of the operational and financial results of Karnalyte Resources Inc. ("Karnalyte" or the "Company") for the six months ended June 30, 2023 and 2022. This MD&A should be read in conjunction with the condensed interim unaudited financial statements of the Company and the related notes thereto for the six months ended June 30, 2023. This commentary is dated August 11, 2023. The financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Statements and should be read in conjunction with the year-end December 31, 2022 audited financial statements. These documents, the Annual Information Form dated March 28, 2023, and additional information about the Company are available on SEDAR+ at www.sedarplus.com. Some of the statements made herein contain forward-looking information and accordingly please refer to the "Forward-Looking Information" section at the end of the MD&A.

OVERVIEW

GENERAL OVERVIEW

Karnalyte was incorporated under the Business Corporations Act (Alberta) on November 16, 2007 and is a Saskatchewan-headquartered company focused on the development of potash and magnesium operations in Saskatchewan. The Company's potash project in Wynyard, Saskatchewan (the "Potash Project") is a proposed 2.125 million tonnes per year ("TPY") potash mine utilizing conventional solution mining methods for potash production, with a vision of ultimately becoming the next greenfield, environmentally innovative mine. The Company proposes that the Potash Project, key to Karnalyte's goal of becoming a low-cost, sustainable producer of high-quality product, be developed in three phases using a modular approach, with a first phase ("Phase I") consisting of a production facility capable of producing 625,000 TPY of potash, increasing to 1,375,000 TPY of potash in the second phase, and ultimately to 2,125,000 TPY of potash in the third phase.

SECOND QUARTER UPDATE

UPDATE ON NATIONAL INSTRUMENT 43-101 COMPLIANT TECHNICAL REPORT

As previously announced, based on an improvement in potash commodity price trends that began in 2021, Karnalyte decided to proceed with an update to its NI 43-101 compliant technical report as part of the Company's strategic development plan. Karnalyte remains focused on the update to its NI 43-101 compliant technical report, a key precursor to any mine construction. Most recently, this included work done by Karnalyte and its advisors to identify cost efficiencies, optimize construction and operation plans, and enhance project sustainability.

In furtherance of these efforts, during the quarter Karnalyte tasked Wood PLC, a leading global consulting and engineering company and the independent lead author of the update, with undertaking additional evaluation of cost savings related to the compaction, drilling and insulation areas of the potash operation. A capital cost estimate workshop will also be held to identify further reductions in CAPEX. Karnalyte will provide a further update as appropriate when the technical report is finalized.

CORPORATE & GOVERNANCE MATTERS

Election of a highly qualified new director

During the quarter and at its most recent annual meeting, Karnalyte shareholders elected Ms. Ritu Malhotra to the board as an independent director of the Company. Ms. Malhotra is the President and CEO of March Consulting Associates. She is an accomplished business leader with experience in engineering, leadership and board governance. Ms. Malhotra's experience in sponsoring and strategic management of projects in Canada's industrial sector, specifically in mining and clean energy, will bring valuable expertise to the Karnalyte board. Ms. Malhotra is a registered professional engineer and was recognized as Engineer of the Year by the Saskatoon Engineering Society in 2020. She was awarded the YWCA Women of Distinction Award in 2022 and the Queen Elizabeth II Platinum Jubilee Award in 2023 for her contributions to business in Saskatchewan. She serves on the Board of Governors at the University of Saskatchewan, is Chair of the Board of the Saskatchewan Industrial & Mining Suppliers Association and is on the Board of Sasktel.

Ms. Danielle Favreau, the Company's interim CEO, commented "We welcome Ms. Malhotra to the Karnalyte board and look forward to benefiting from her many years engineering and leadership experience especially in the potash industry as we pursue the development of the Wynyard Potash Project".

With the election of Ms. Malhotra and the concurrent retirement of incumbent director Mr. Gerald Scherman, the board continues to consist of five directors, all of whom are independent for the purpose of National Instrument 58-101 *Disclosure of Corporate Governance Practices*.

Mr. Scherman joined the Karnalyte board in 2019 and brought significant experience in the mining industry having previously served as the CFO with AREVA Resources Canada Inc. (now Orano Canada Inc.).

Ms. Danielle Favreau commented "Mr. Scherman has been an extremely valuable member of the Board of Directors and Karnalyte wishes to express its sincere thanks to him for his significant contributions."

Settlement of Lawsuits

During the quarter and after months of negotiations and diligent efforts, the Company reached a settlement with Messrs. Peter Matson and Gregory George Szabo who, on February 1st, 2021 filed an originating application against Karnalyte, Gujarat State Fertilizers and Chemicals Limited ("GSFC"), each of the Company's directors at the time, the interim CEO of the Company, and a former director of the Company. This settlement and others achieved during the past 12 months demonstrate the Company's commitment to resolving legal disputes with a continuing objective to advance the Company's initiatives.

OUTLOOK FOR 2023

In 2023, the Company plans to complete the update to its NI 43-101 technical report; to continue to work on identifying cost efficiencies, optimizing construction and operation plans, and enhancing project sustainability; and to increase business development activities to seek out and attract investment and strategic partners to move one or both of the Company's projects forward to development.

RESULTS OF OPERATIONS

GENERAL AND ADMINISTRATIVE EXPENSES

General and administrative ("G&A") costs for the six month period ended June 30, 2023 amounted to \$639,000 which is a decrease of \$136,000 from the comparative 2022 amount.

The key components of the G&A costs are as follows:

	G&A Expenditures (CAD \$ thousands)			
	Three months ended June 30,		Six months ended June 30,	
	2023	2022	2023	2022
Salaries, wages and benefits	63	63	132	131
Business development, investor relations, regulatory fees	26	51	51	92
Accounting and legal	49	91	118	164
Consulting	26	36	60	87
Directors Fees	60	68	116	121
Office and general	74	90	162	180
Total general and administrative	298	399	639	775

Business development, investor relations and regulatory fees for the six month period ended June 30, 2023 amounted to \$51,000 compared to \$92,000 in the 2022 comparative period, which is a decrease of \$41,000. The decrease is largely due to website and brand update efforts in 2022 and a reduction of annual regulatory filing fees in 2023.

Accounting and legal expenses for the six month period ended June 30, 2023 were \$118,000 compared to \$164,000 in the 2022 comparative period, which is a decrease of \$46,000 due to a reduction in legal securities work and accounting quarterly review costs.

Consulting expenses for the six month period ended June 30, 2023 amounted to \$60,000 compared to \$87,000 in the 2022 comparative period, which is a decrease of \$27,000. Expenses in this category are largely due to a consulting contract with the interim CFO.

Director fees for the six month period ended June 30, 2023 amounted to \$116,000 compared to \$121,000 for the 2022 comparative period, which is a decrease of \$5,000. The number of directors has remain unchanged at five.

OTHER COSTS IMPACTING COMPREHENSIVE LOSS

Depreciation for the six month period ended June 30, 2023 was \$6,000 compared to \$6,000 in the 2022 comparative period.

Share-based compensation expense for the six month period ended June 30, 2023 was \$6,000 compared to \$25,000 in the 2022 comparative period. Share-based compensation expenses in the first two quarters of 2022 related to both the 460,000 stock options granted in July 2020 as well as the 300,000 stock options granted in November 2021. In the first two quarters of 2023, the share-based compensation expenses only related to the 300,000 stock options granted in November 2021. These expenses are all non-cash in nature and stock options are expensed over a two year vesting period using a declining balance method.

Impairment expenses for the six month period ended June 30, 2023 were \$288,000 compared to the period ending June 30, 2022 of \$550,000. In 2014, previous management determined assets with a carrying amount of \$63,165,000 were no longer recoverable. At June 30, 2023, the Company determined that those

impairment indicators continue to exist. Therefore, incremental expenditures of \$288,000 incurred on intangible and mine development assets in the first two quarters of 2023 were determined not to impact the previously determined recoverable amount. For additional information, refer to the notes to the financial statements dated December 31, 2015 available on SEDAR+ at www.sedarplus.com.

Other income for the six month period ended June 30, 2023 was \$113,000 compared to \$458,000 in the 2022 comparative period. While there is some rental income in this category from leasing the Company's land holdings to local Wynyard area farmers, the majority relates to a \$92,000 recovery recorded as a result of a change in estimate of the Company's decommissioning liability, as compared to the \$442,000 recovery recorded in the first two quarters of 2022.

Net finance income for the six month period ended June 30, 2023 was \$50,000 compared to net finance expense of \$10,000 in the 2022 comparative period. Finance income relates to the corresponding interest income that the cash and cash equivalents generate. Finance expense relates to the accretion of the decommissioning liability.

SUMMARY OF QUARTERLY RESULTS

The following table provides selected financial information of the Company for each of the last eight quarters ended at June 30, 2023:

	2023		2022				2021	
	Jun 30	Mar 31	Dec 31	Sep 30	Jun 30	Mar 31	Dec 31	Sep 30
Total revenue	-	-	-	-	-	-	-	-
Comprehensive (loss)	(390)	(386)	(453)	(432)	(424)	(419)	(498)	(279)
Basic and diluted loss per share	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)
Total current assets	3,335	4,069	4,209	4,628	1,504	1,934	2,498	2,793
Total assets	9,003	9,740	9,883	10,306	7,185	7,826	8,393	8,695
Total liabilities	1,896	2,246	2,006	1,976	2,225	2,468	2,630	2,438
Total shareholders' equity	7,107	7,494	7,877	8,330	4,960	5,358	5,763	6,257

*Expressed in thousands except loss per share

The comprehensive losses in the first two quarters of 2023 were driven primarily by G&A expenses and particularly office and general expenses, salaries and wages, directors fees and accounting and legal expenses.

The third quarter of 2021 was positively impacted by a reduction in salaries, a reduction in legal expenses, reduction in consulting, and the gains from selling non-strategic assets. The loss in the fourth quarter of

2021 largely relates to expenditures in the normal course of business relating to mineral leases, directors fees, audit accrual, legal fees, consulting fees, salaries, and insurance. During the four quarters of 2022, impairment expenditures increased due to the update of the NI 43-101 technical report. The first quarter of 2023 was positively impacted by a reduction in regulatory filing fees and consulting expenses. The second quarter of 2023 was positively impacted by a reduction in legal and accounting fees.

Past performance is not a guarantee of future performance and the information in this MD&A is not necessarily indicative of results for any future period. Factors expected to impact general and administrative expenses in future periods have been described throughout this MD&A.

Current assets principally reflect activity in the cash and cash equivalents account. Cash outlays vary over the quarters depending on the Company's activities. On August 3, 2022, the Company's Rights Offering was completed which resulted in an issuance of 11,034,135 common shares at a price of \$0.35 per share for gross proceeds of \$3,862,000.

Total assets on a quarterly basis reflect two main components: cash from financings still available to the Company and capitalized expenditures on capital assets and mineral properties for moving the Potash Project forward. Total assets remained relatively constant for most of the periods above, with the exception of the increase in the third quarter of 2022 due to the Rights Offering.

Total liabilities for the periods above relate to trade and other payables and the decommissioning liability. These balances vary in the analysis due to the timing of the payments required relative to the work performed in bringing the Potash Project to its current level, as well as adjustments to the decommissioning liability due to changes in the average bond and inflation rates. Balances in all the quarters presented include the accrual of an estimate of the costs of restructuring that took place in the second and third quarters of 2017.

Total shareholders' equity is impacted by the quarterly comprehensive losses and the share-based compensation expense as the number of shares outstanding remains unchanged, with the following listed exceptions. In the second quarter of 2022, share options were exercised and, as a result, the Company issued 75,000 common shares for proceeds of \$14,000. Also, on August 3, 2022, the Company's Rights Offering was completed which resulted in an issuance of 11,034,135 common shares at a price of \$0.35 per share for gross proceeds of \$3,862,000. The Company did not pay any commission on the Rights Offering. The Company paid \$72,000 in legal, regulatory and printing costs in relations to the Rights Offering. As at June 30, 2023 the Company had 53.28 million common shares outstanding.

INVESTING

The Company capitalizes costs that are determined to provide future benefits and charges other costs to comprehensive loss including salaries, support and office costs, community relations programs and other administrative related expenditures. Costs directly related to capital assets are capitalized to appropriate categories and depreciated over their useful lives.

Expenditures to date were focused on the completion of the Company's resource reports, including updating the Company's prior technical reports and 2013 environmental impact statement, confirming the resources and reserves through drilling wells on the initial focus area and preparing the Company for construction by advancing detailed engineering and completing initial site preparation.

INTANGIBLE ASSETS

During the six month period ended June 30, 2023, \$288,000 in additions to intangible assets were impaired. The additions to intangible assets all related to the Potash Project. The net balances classified as intangible assets are as follows:

	Intangible Assets (CAD \$ thousands)	
	June 30, 2023	December 31, 2022
Mineral property		
Surface land	4,804	4,804
Drilling	245	245
Balance, end of period	5,049	5,049

CAPITAL ASSETS

The net balances classified as capital assets are as follows:

	Capital Assets (CAD \$ thousands)	
	June 30, 2023	December 31, 2022
Machinery and equipment	-	-
Buildings	101	106
Land	125	125
Land improvements	18	19
Furniture and equipment	-	-
Computer hardware	-	-
Assets under construction	-	-
Balance, end of period	244	250

There were no additions to capital assets in the first two quarters of 2023. The decrease in capital assets is a result of depreciation expenses of \$6,000 recognized during the first two quarters of 2023.

The Company's ability to secure adequate financing for the development of the Potash Project on economic terms could result in a material difference from the Company's estimate of the recoverable asset.

LIQUIDITY AND CAPITAL RESOURCES

At June 30, 2023, the Company had working capital of \$2.7 million compared to \$0.6 million at June 30, 2022 including \$2.7 million and \$1.0 million, respectively, in cash and cash equivalents.

As at June 30, 2023 and 2022, the Company also had \$0.4 million in restricted cash that was set up as a requirement from the Government of Saskatchewan with respect to reclamation obligations regarding the Potash Project. The Company has updated its reclamation program for the Potash Project in accordance with Government of Saskatchewan regulations. This update may result in the requirement to increase the amount held as restricted cash in order to satisfy the financial assurance requirements of the Government of Saskatchewan in future periods.

The Company maintains cash in bank accounts for day to day operations and invests the excess in overnight financial instruments in high interest saving accounts that are highly liquid.

The Company has sufficient cash to meet its short-term corporate operating and capital requirements but does not currently have adequate funds to proceed with full-scale development of the solution mining facility. Please refer to the Liquidity Risk and Going Concern section under the Financial Risk Factors heading below.

CONTRACTUAL OBLIGATIONS

In addition to the minimum regulatory expenditure requirements, the following table summarizes the commitments of the Company as at June 30, 2023:

Contractual Obligations (CAD \$ thousands)					
Payments due by period					
	Total	Less than one year	Two - three years	Four - five years	More than five years
Trade and other payables	588	588	-	-	-
Leases on mineral property	4,435	68	735	735	2,897
Project contracts	50	50	-	-	-
Total	5,073	706	735	735	2,897

Trade and other payables relate to operating and investing expenditures that were payable at the period ended June 30, 2023.

Leases on mineral property refer to the annual fees which are required to maintain the mineral leases related to the Potash Project. The Potash Project comprises three mineral leases. KLSA 010 has a term of 21 years and expires on September 7, 2031. KL246 and KL247A also have terms of 21 years and both expire on April 24, 2037. The Company is required to pay annual lease payments of \$10.00 per hectare on any area

held under lease for the term of the lease for a total cost of \$367,300 per year. The Company is also required to expend not less than \$3,000,000 for work during the first three years of the term of the lease. Expenditures made to date on the property have satisfied this requirement.

Project contracts are in place for various investor relations and consulting services.

RELATED PARTY TRANSACTIONS

There were no material changes to management compensation arrangements and no other related party transactions for the six months ended June 30, 2023.

RESTRICTIONS ON DISPOSITION OF THE POTASH PROJECT

Pursuant to the terms of the subscription agreement (the “**Subscription Agreement**”) and the offtake agreement (the “**Offtake Agreement**”) between the Company and GSFC, each dated January 10, 2013, the Company must not divest, sell, assign, transfer or otherwise dispose of any part of its interests in the Potash Project without the prior written consent of GSFC until the third anniversary of the date on which the first shipment for delivery of products is dispatched by the Company in accordance with the terms of the Offtake Agreement (the “**Project Lock In Period**”). After the expiry of the Project Lock In Period, a person may acquire an interest in the Potash Project subject to GSFC’s right to terminate the Offtake Agreement at that time. The Subscription Agreement provides that, subject to certain conditions, the above-described restrictions on disposition do not apply to a creation or grant of a security interest to a lender providing financing for the Potash Project (including for an expansion thereof). The Offtake Agreement provides that following the expiry of the Project Lock In Period, the Company may dispose of any part of the Potash Project that is not part of the Company’s subsurface mineral lease KLSA 010 or that is not intended or reasonably required for the three phases of the Potash Project.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with International Financial Reporting Standards (“**IFRS**”) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amount of assets, liabilities, income and expenses. The Company evaluates judgments and estimates periodically based on historical experience and various assumptions that are considered reasonable in the circumstances. Actual results may differ from those reported. The Company reviews significant areas subject to judgment and estimation with the Audit Committee and independent auditors. Significant areas requiring judgment and estimates include:

STAGE OF DEVELOPMENT

The Company is in the development stage of its history and at this stage of the Company’s growth, it is subject to the risks associated with early stage companies, including uncertainty of future revenues, developing acceptable markets and growth into established markets, profitability and the need to raise additional financing to continue to progress its Potash Project.

Continued exploration and development of the property is dependent on the Company’s ability to obtain necessary financing. As the Company is not currently producing from its property, it will be necessary for the Company to seek additional equity or debt to finance its programs.

INTANGIBLE ASSETS AND PROPERTY, PLANT AND EQUIPMENT

The Company's exploration and evaluation expenditures relating to the acquisition of mineral properties, leases, and the exploration and development thereon are recorded at cost and include direct and indirect acquisition and exploration costs associated with specific mineral properties. These costs are capitalized on the basis of the potential realization from the underlying asset and will be amortized over the shorter of estimates of reserves or service life, following the commencement of production, or written off, if the properties are sold or abandoned.

Assets under construction, machinery and equipment, buildings, vehicles, furniture, land improvements and leasehold improvements are recorded at cost. Capital assets are depreciated over their estimated useful lives.

The Company reviews exploration and evaluation assets, capital assets and other non-financial assets for indicators of impairment at each reporting period. Impairment indicators are used to determine whether carrying values of assets should be assessed for impairment or whether a reversal of impairment may be required.

Internal and external indicators of impairment for capital and other non-financial assets are considered, including significant changes in the extent or manner in which an asset is expected to be used. The use of a significant portion of the Company's capital assets is related to exploration and evaluation activity.

Indicators of impairment for exploration and evaluation assets include the period for which the Company has the right to explore, expected renewals of exploration rights, whether substantive exploration and evaluation expenditures on mineral properties are budgeted, and results of exploration and evaluation activities on the exploration and evaluation assets. Management also considers whether sufficient data exists to indicate that the carrying amount of capital assets and exploration and evaluation and other assets is unlikely to be recovered in full from successful development or by sale.

In measuring impairment, estimates of future cash flows require assumptions about future business conditions and other developments. Significant, unanticipated changes to these assumptions could require a provision for impairment in the future.

DECOMMISSIONING PROVISIONS

Amounts are recorded for decommissioning provisions that will be incurred by the Company at the end of the operating life of the facilities and properties, and upon retirement of its mining assets. Estimates of these costs are subject to uncertainty associated with the method, timing and extent of future decommissioning activities. The provision and related asset and expense are impacted by estimates with respect to the costs and timing of decommissioning.

SHARE-BASED PAYMENTS

The Company has share-based payments expenses for stock option awards to employees, directors, officers and consultants, as explained in the Company's financial statements. IFRS requires that all share-based awards be accounted for using the fair value method. Under this method, the Black-Scholes option pricing model requires estimates of the expected life of the option, forfeiture rates, stock volatility and the risk-

free interest rate expected over the life of the option. A change in these assumptions could materially change the amount of share-based payments expenses recorded.

CONTINGENT LIABILITIES

Contingent liabilities are reviewed continuously to assess whether an outflow of cash has become probable. If the recognition criteria are met, then a provision is recorded in the period in which the change in probability occurs. Assessing whether a contingent liability is probable requires the Company to make judgments about the existence of past events and the application of applicable laws, contractual or constructive obligations.

FINANCIAL RISK FACTORS

CREDIT RISK

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its commercial obligations. The Company has no significant concentration of credit risk arising from operations. The Company's cash and restricted cash is held with large Canadian financial institutions and management believes the risk of loss to be remote.

LIQUIDITY RISK AND GOING CONCERN

The Company manages liquidity risk by maintaining sufficient cash balances to meet liabilities when due. As at June 30, 2023, the Company had cash and cash equivalents totalling \$2,683,000 (2022 - \$973,000) to settle current liabilities of \$588,000 (2022 - \$905,000). As at June 30, 2023 and June 30, 2022, the Company's trade and other receivables are subject to normal trade terms.

Management is aware, in making its going concern assessment, of material uncertainties related to events and conditions that may cast significant doubt upon the Company's ability to continue as a going concern. The Company is in its pre-development phase and therefore there is material uncertainty regarding the Company's ability to raise additional funds to move forward to the production stage. As at June 30, 2023, the Company had working capital (current assets less current liabilities) of \$2,747,000. In addition to ongoing operating expenses, the Company is committed to expenditures in 2023 and subsequent years on its regulatory spending requirements and mineral properties to keep the Company in good standing. The Company's cash position may also be impacted by a requirement to fund the decommissioning liability. The Company has sufficient cash to meet its short-term corporate operating and capital requirements but does not currently have adequate funds to proceed with full-scale development of the solution mining facility. The ability of the Company to continue as a going concern is dependent upon obtaining further equity issuances or other forms of financings. There is no assurance that the Company will be successful in obtaining required funding at an acceptable cost as and when needed or at all. Failure to obtain additional funding on a timely basis may cause the Company to postpone development plans, forfeit rights in its properties or reduce or terminate its operations.

The financial statements do not include any adjustments to carrying values of asset amounts and liabilities, or reported expenses that may be necessary if the going concern assumption were not appropriate.

MARKET RISK

Market risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The Company's future potash sales are exposed to price risk with respect to North American and international potash prices.

CURRENCY RISK

The Company's functional currency is the Canadian dollar with the majority of transactions denominated in Canadian dollars. At this time management believes the foreign exchange risk derived from currency conversions is not significant and therefore does not hedge its foreign exchange risk. At June 30, 2023, the Company held the majority of its cash in Canadian dollars.

INTEREST RATE RISK

The Company's trade and other payables are non-interest bearing and have contractual maturities of less than 45 days. As at June 30, 2023, the Company's only interest bearing asset is cash in high interest saving accounts and a small amount of cash equivalents held in Guaranteed Investment Certificates. Cash and cash equivalents earn interest at prevailing short-term interest rates. During the six month period ended June 30, 2023, the Company earned interest income of \$71,000 (2022 - \$7,000) from its cash and cash equivalents.

INTERNAL CONTROLS

DISCLOSURE CONTROLS AND PROCEDURES

The Company has established disclosure controls and procedures for the timely and accurate preparation of financial and other reports. Such disclosure controls and procedures are designed to provide reasonable assurance that material information required to be disclosed is recorded, processed, summarized and reported within the periods specified by applicable securities regulations. In addition, the disclosure controls ensure that information required to be disclosed is accumulated and communicated to the appropriate members of management and properly reflected in the Company's continuous disclosure filings.

As with most small or developing companies and consistent with the concept of reasonable assurance, the Company recognizes that the relative cost of maintaining these disclosure controls and procedures should not exceed their expected benefits. As a result, the Company's disclosure controls and procedures can only provide reasonable assurance, and not absolute assurance, that the objectives of such controls and procedures are met.

The Interim Chief Executive Officer and Interim Chief Financial Officer are responsible for evaluating the disclosure controls and procedures. They have concluded that the design and operation of these disclosure controls and procedures were not effective due to the existence of material weaknesses in the internal controls over financial reporting noted in the following section.

The Company mitigates these weaknesses by using external consultants as appropriate; however, such mitigating procedures do not constitute compensating controls for the purposes of National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings* ("NI 52-109").

INTERNAL CONTROLS OVER FINANCIAL REPORTING (ICFR)

The Interim Chief Executive Officer and Interim Chief Financial Officer of the Company are responsible for designing and ensuring the operating effectiveness of internal controls over financial reporting. They are also responsible for causing the internal controls to be designed and operated effectively under their supervision. They are intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. It is management's belief that any control system, no matter how well conceived or operated, can provide only reasonable, but not absolute, assurance that the objectives of the control system are met. An internal control system cannot prevent all errors or fraud.

The Company does not have adequate in-house personnel to properly implement segregation of duties with respect to day-to-day accounting, complex accounting and non-routine transactions that may arise and also to prevent and monitor the potential for management override. It is not deemed economically feasible at this time to have such personnel.

These material weaknesses may increase the risk of material misstatements in the financial statements; the Company mitigates these weaknesses by using external consultants as appropriate; however, such mitigating procedures do not constitute compensating controls for the purposes of NI 52-109.

OFF BALANCE SHEET ARRANGEMENTS

The Company has no off balance sheet arrangements at the time of this MD&A.

OUTSTANDING SHARES

As of the date of this MD&A, the Company has 53,283,982 Common Shares and 630,000 stock options issued and outstanding.

FORWARD-LOOKING INFORMATION

Certain statements in this MD&A may constitute "forward-looking" statements which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking information is often, but not always, identified by the use of words such as "anticipate", "believe", "could", "estimate", "expect", "plan", "intend", "forecast", "future", "guidance", "may", "predict", "project", "should", "strategy", "target", "will" or the negative or similar words or phrases suggesting future outcomes or language suggesting an outlook.

Forward-looking statements may include, but are not limited to, management's expectations, intentions, and beliefs concerning: the development and operation of the Potash Project or the Proteos Nitrogen Project; future extraction and exploitation of mineral deposits; capital expenditure requirements; future commodity prices; expectations regarding prices and costs; expectations regarding the Company's ability to

obtain additional financing necessary to develop the Potash Project or the Proteos Nitrogen Project; expectations regarding the production capacity of the Potash Project and the Proteos Nitrogen Project; expectations regarding markets for potash in North America and globally; expectations regarding markets for nitrogen fertilizer products; expectations regarding the distinction between standard-grade and high-grade potash; expectations regarding markets for magnesium; the effectiveness of the Company's anticipated solution mining methods; expenditures to be made by the Company to meet certain work commitments; work plans to be conducted by the Company; reclamation and rehabilitation obligation and liabilities; treatment under governmental regulatory regimes with respect to environmental matters; treatment under governmental taxation regimes; impact of foreign governments and regulation on the Company's operations; future development of infrastructure; government regulation of mining operations; dependence on key personnel; and competitive conditions.

Forward-looking statements in this MD&A include statements regarding: the Company's ability to commence and increase production from 625,000 TPY, to 1.375 million TPY, and thereafter to 2.125 million TPY of potash; the production of potash, nitrogen fertilizer products, or magnesium; the costs related to the operation of the plant and facilities will be consistent with other solution mining operations subject to differences in the Company's mineral body and processing; the implementation and ongoing use of solution mining process; further seismic exploration and drilling; global fertilizer demand and consumption; capital expenditure and operational expenditure estimates; anticipated results of development and extraction activities and estimated future developments; the Company's ability to produce sufficient potash to meet its obligations under the Offtake Agreement; the Company's ability to obtain additional financing on satisfactory terms; the market prices for potash, nitrogen fertilizer products, and magnesium; the Company's ability to pump the waste underground to eliminate surface salt tail piles; the Company's ability to economically extract and process mineralized material into potash; and the improvements that the Company has developed for the solution mining process are as effective as expected by the Company.

Such forward-looking statements are based on a number of material factors and assumptions, including: the stabilization of the global potash industry and market; the Company obtains additional financing in the future; the Company executes its project development plans in a manner consistent with the Company's technical report filed on July 15, 2016 (the "**2016 Technical Report**"); the Company executes its discounted cash flow model assumptions as described in the 2016 Technical Report; estimates of mineral resources and mineral reserves in the 2016 Technical Report are accurate; full potash production is reached; that the Company continues to have rights to the property subject to subsurface mineral leases KL 246, KL 247A and KLSA 010, and such rights are not challenged or impacted in any material manner; that the Company is able to obtain required approvals, licences and permits, in a timely manner; the Company is able to successfully develop and market nitrogen fertilizer products; the Company is able to successfully develop and market magnesium products; the Company's key senior management continue in their respective roles with the Company; the Company's intellectual property is not challenged; the Company does not become subject to litigation; the Company's ability to meet its obligations under the Offtake Agreement; environmental and other applicable law and other regulations are not amended, repealed or applied in a manner that impacts the development and operation of the Potash Project or the Proteos Nitrogen Project as currently anticipated; there are no adverse changes to the price of potash, nitrogen fertilizer products, or magnesium that would adversely affect the prospects for developing and operating the Potash Project or the Proteos Nitrogen Project, or making it inadvisable or uneconomic to proceed with development; the future mining operations operate as anticipated; the Company's ability to maintain and develop positive relationships with

foreign governments and future business partners; the Company is able to develop and maintain the infrastructure required to export, store and transport its potash, nitrogen fertilizers, or magnesium production; there are no comparable mining companies targeting carnallite in North America; and the continued existence and operation of the primary potash production facility.

Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements, including, but not limited to, the factors discussed under “Financial Risk Factors” elsewhere in this MD&A and the following factors, which are discussed in greater detail under the “Risk Factors” section of the Annual Information Form: exploration, development and operation risks related to the Potash Project and the Proteos Nitrogen Project; the ability to secure adequate financing to implement the Company’s strategic and development objectives; the ability to maintain adequate capital to meet the Company’s financial commitments; the successful execution of the Company’s project plans; the uncertainty regarding the estimation of mineral resources and mineral reserves in the 2016 Technical Report; the lack of current revenues and uncertainty about future revenues; the risks associated with the limited operating history of the Company; the lack of developed markets for the Company’s magnesium products; the unproven nature of solution mining of carnallite in Saskatchewan; no assurance of titles, leases, or maintenance of existing permits; permit and licensing requirements related to exploration and development activities; the Company’s ability to satisfy its material agreements, including the Offtake Agreement; the risks associated with the enforcement of the Company’s material agreements, including the Offtake Agreement; the potential loss of key employees, technical experts or key suppliers; the potential for a volatile market for the Common Shares of the Company; the potential dilution of shareholders through future financings; failure to protect the Company’s intellectual property rights; litigation and tax matters; adequacy of the Company’s insurance coverage; adequacy of the Company’s internal controls over financial reporting; environmental and regulatory risks; the volatility of potash and magnesium prices; the cyclical nature of the potash and magnesium industries; availability and cost of labour and materials required for the construction of Phase I; competition; and currency exchange rate fluctuations.

Although the forward-looking statements contained in this MD&A are based upon what management of the Company believes are reasonable assumptions, the Company cannot assure investors that actual results will be consistent with these forward-looking statements. These forward-looking statements are made as of the date of this MD&A and are expressly qualified in their entirety by this cautionary statement. Subject to applicable securities laws, the Company assumes no obligation to update or revise them to reflect new events or circumstances.

Further information about the factors affecting forward-looking statements is available in Karnalyte’s Annual Information Form and the audited annual financial statements for the year ended December 31, 2022, which have been filed with Canadian provincial securities commissions and are available on SEDAR+ at www.sedarplus.com.
